Bentley News

J. H. Dameron, McPherson and Thompson, of Edmonton are away on a hunting trip with Lake Lake, Mr. and Mrs. Bert Thorp and family took a trip around to Pigeon Lake on Sunday.
Miss Blake spent the week end in Lacombe.
Mrs. McMillan is back staying with her daughter Mrs. W. F. Johnston.
Miss Hazel Garries entertained at Bridge Wednesday evening.
Born to Mr. and Mrs. Peter Fox, the Baptist Community Hospital, Oct. 4, a daughter.
The Bentley Teachers are all attending the convention at Lacombe.
Miss McLagan is spending the holidays at her home in Edmonton.
Arthur Arthur Weolner, son of Mr. and Mrs. Otto Weolner, of Aspen Beach, narrowly escaped drowning, Tuesday afternoon, Oct. 4th, when he fell in the creek. Dr. Henry was called and the child is now reported to be doing well.
Isabel Henry, daughter of Dr. and Mrs. Henry celebrated her fourth birthday with a party on Tuesday afternoon.

Lincoln News

Two Lincoln ladies are very busy preparing for that big Chicken Supper on Oct. 21st. Anyone that has not got a ticket on the wool combed better get in touch with some of the ladies of the district, for on the 21st the Comford will be given away to the one that holds the lucky number. A dance will take place after the supper and we assure you of a good time as well as good music.
We are pleased to hear Mrs. Robt. Kinsley has been sick for some weeks is improving.
Threshing is nearly over in this District and the farmers are all looking for that raise in wheat prices.
The Community Circle met with Mrs. Morrish and Miss May Morrish, yesterday.

Spruceville News

Rally Day will be observed next Sunday morning at Spruceville School at 11 o'clock. The offering will be in aid of the Sunday School work.
A Lantern Lecture will be given at Canyon Church, on Friday night, at 8:45 by Rev. H. D. Riggs, of Blackfalds. A collection will be taken. Words of appreciation have been spoken on the lecture. The views, 73, are on the Peace River District.
The Annual Chicken Supper will be held in the hall Nov. 4th. Keep the date in mind and watch this column for further particulars.
Mr. and Mrs. Boulter motored to Wetaskiwin on Sunday to visit Mr. and Mrs. George.
The regular night meeting of the U.F.A. and U.F.W.A. will be postponed this month on account of the busy season.
Miss Roberts of Edmonton, left for home on Saturday after paying a short visit to Mr. and Mrs. D. Bodin.

Morningside News

The September meeting of the W.M.S. was held at the home of Mrs. Grant. The president, Mrs. Wheeler, presiding. Meeting opened with the reading of the 100th Psalm. Arrangements were made to hold the annual chicken supper in the church on Friday evening, October 7. Admission 50c, and 25c.
Rev. M. L. Wright is spending this week with Mrs. Wright in Edmonton. Rogers Wright who has spent the holidays here, returned to the city with his father and will attend university.
Dr. Gordon Sutherland is spending a couple of weeks with Mrs. Sutherland at Fleet.
Miss Elizabeth Sutherland and Miss Annie Jack are attending High

AS EXPECTED - WE WIN!

On Monday last, at the sitting of the Supreme Court at Red Deer, before Chief Justice Simmons, the case of J. J. Maloney vs. The Western Globe for defamatory libel, was called. Maloney did not appear to prosecute and had no counsel representing him in court. C. B. Halpin & Sons, together with their solicitor, Mr. J. S. McCormick, were present and prepared to go ahead with the case. In the circumstances, the Chief Justice gave The Western Globe a clean bill of health by dismissing the charge. In a report sent in from Red Deer to the Edmonton Journal, reporter saw fit to make the statement that this case had been settled out of Court, which would give a most erroneous impression. The Western Globe, as we stated when the charge was laid, would make no settlement out of court. We were prepared to "take a licking" sooner than throw up our hands and make an apology of any nature. We had a showdown and held the best hand. Maloney may now use that yellow drape he is so fond of springing at his meetings to good advantage.

Church of England

Diocese of Calgary
St. Cyprian's Church, Lacombe
Rector: Rev. T. H. Chapman
Organist:
Miss Kathleen C. Walters, L.A.B.
Thursday, October 6th—Adult and Boy's Choir Practice at 7:30 p.m. Sharp!
October 9th, 20th Sunday after Trinity.
10:00 a.m. Sunday School.
11:00 a.m. Morning Prayer.
7:30 p.m. Evening Prayer.
Thursday, October 13th—Special Meeting of the Red Deer Diocese at Red Deer. Representatives of the Laity are requested to be present at 3 p.m. All Members of the Church are at liberty to attend the Harvest Supper at 6:30 p.m., and the evening session which will be addressed by the Bishop at 7:30.
Sunday, October 16th, "Children's Day," Special Services for those of all ages.
Sunday, November 6th—The Bishop is expected to be here at 11 a.m. for the purpose of administering the Sacramental Rite of Confirmation, or "Laying on of Hands," and he will also be the Celebrant at the Holy Communion which will immediately follow the Confirmation.

Ladies' Golf News

There will be a Tea on Friday, October 7th. All members are urged to be present, as there will not be many more of these Tea this season. Golfers are asked to look at the draws which have been posted for the Tournament, and to play their games promptly as possible. Please remember that one person can hold up the whole tournament by neglecting to play the game scheduled for her. Co-operate with the Committee, and let's make this tournament a success.
The Draw for the tournament is published this week, and there are copies of it at the Club House and in David Hay's Store Window. Watch them.

Playing Into Hands of the U.F.A.

It would seem that the Conservative and Liberal parties in Alberta are like the Bourbons in that they never learn anything and never forget anything. Both are bitterly opposed to the continuance of U.F.A. class governments in the province and their representatives fight the Brownlee administration stoutly in the legislature, either in concert or separately. But when election time comes around, they are found staging three-cornered contests in most of the ridings, making it easy for the government candidates to get elected.
As has been pointed out, the Brownlee government is in power on a minority vote. Only 1,902 votes were necessary to elect a U.F.A. candidate in the 1930 election, taking the province as a whole. To elect a Liberal required 4,207 votes and approximately the same number of ballots were required to elect a Conservative. The Liberal members averaged 3,583 votes each, while the three Independents polled on an average of 9,318 votes.
One provincial election is in sight and another is a possibility. In Camrose, the riding now vacant through the death of Hon. V. W. Smith, Conservative and Liberal candidates are already in the field. This will make it easy for the U.F.A. nominee to slip in. The Conservative stayed out of the constituency in the provincial election in 1930 and, in a straight fight, the Liberal gave the late Mr. Smith a close run. Under the present circumstances the Conservatives should have stayed out of the by-election. A Liberal might easily defeat an "entire government" candidate lacking cabinet prestige.

CARD OF THANKS

We wish to take this means of expressing our grateful thanks and deep appreciation of the many thoughtful and kind words and letters of sympathy and condolence on the occasion of the last illness and the death of our beloved father, and especially to those who so very kindly sent floral tributes.
Mr. A. D. Swanson,
Mrs. R. M. Gibson,
Mrs. R. V. Bagley,
Mr. Wm. Swanson,
Mrs. Mary Burris.
Try the Big Johnson Floor Polisher. It gives wonderful results. Morrison & Johnston, Ltd.

GREAT FIGHT PROGRAM

A crowd of over 500 fans crowded the Lacombe Arena on Friday night last to witness the best fighting card yet presented in Central Alberta. The fight, which was held under the auspices of the Lacombe Hockey Club, drew people from almost every town in Central Alberta. The main bout of the evening, a light-heavyweight match between Bob Fox and "Lefty" Boelke, which was scheduled for 12 rounds, ended in the 4th round, when Boelke knocked Fox out for the count with a hard punch to the solar plexus. The preliminaries were very fast and a lot of tricky fighting was witnessed. Of the preliminaries the outstanding bout was, in the opinion of most of the people, between D. Wells, of Penhold, and Slippy Kitch, of Lacombe. Wells won the fight with a technical knock out. Sonny Frizzell and Freddy Slater, juvenile fighters put up a great fight and received a big hand from the crowd. Fred Doherty, of Lacombe and Lyle Campbell, of Penhold turned in a nice exhibition, Doherty getting the decision. Pete Holm of Stettler and Dick Whiteheads, of Penhold also gave a good account of themselves. Alice Sissons, of Alx and Gray Mosely, of Penhold put up a nice exhibition, and although Sissons won on a K.O. Mosely fought a game fight, and on several occasions showed a lot of speed. A nice exhibition bout took place between Baden Whitesides of Penhold and Langley, these two light-heavies were well matched and an excellent bout ensued. Denver Kid and Kid Griffiths of Alx fought a short but interesting bout. Although the main bout ended in the 4th, some good fighting was done on both sides. Boelke forced the fight most of the time, and his left was dangerous at all times. Fox, although in good condition was unable to handle Boelke's body punches, and Boelke soon wore him down with repeated punches to the plexus. In the opening round Fox fought carefully, and tried to reach his opponent with twigs to the head, but Boelke was fast and Fox could not connect with any degree of force. In the second round, Boelke broke through Fox's guard for several hard blows to the plexus, which soon showed their effect on Fox. It was apparent to everyone that Boelke was depending almost solely on body punches. Near the end of the third round, Boelke crashed in a short, powerful wallop to Fox's plexus and Fox went down for a count of 6. When he went up, Fox was still groggy. Going into the fourth round, Boelke was apparently weak from the smashing punishment of the previous round, and just could not keep himself covered and Boelke following up his advantage, fairly rained blows to the body which Fox could not stand up under. Near the end of the fourth round, Boelke smashed over a hard left, and this was written to the bout as Fox sank slowly to his hands knees and the referee counted him out. The judges of the fight were J. H. Lawrence, of Red Deer, and School Inspector McLean. The referee was Jim Grayley.

The Manitoba Trust Funds Scandal

Winnipeg, Sept. 23.—Slowly unfolding the mystery which envelops the loss of nearly \$1,000,000 in the endowment funds of the University of Manitoba, a board of inquiry pursued its work today.
Less than five hours' investigation by the Board reveals that books of the University had not been completely audited in the last eight years; that no report had been tendered as to the condition of investments; that the board of governors had failed to comply with the statutes of the institution, and that John A. Machray acted as both chairman of the governors and bursar contrary to the University Act.
Today's session was occupied with the tracing by counsel of the history and loss of late institution and the testimony of Dr. W. J. Spence, registrar and secretary to the board of governors.
In reply to a question by Mr. McWilliams, the registrar told the commission that the late H. Shanks, chief accountant for the investment company of Machray and Sharpe, through whose accounts funds of the University were handled, was secretary for the "Land Board" whose duty it was to administer the lands granted the University by the government for investment purposes.
Mr. Spence who told the board budget accounts prepared by the bursar for the board of governors never contained any particulars of investment accounts, though they did deal with "anticipated revenues and proposed expenditures" for the maintenance account.
Transfer of all bonds or funds from the investment account had to be made by the signature of the university upon them. Dr. Spence, however, said on only two occasions could he remember ever signing a transfer of sale or disposal of and of those occasions he signed documents for transfer of \$250,000 in Dominion Government bonds.
The first request for his signature was made in a letter from Machray, who assured the registrar the transfer would be approved by the board of governors at their next meeting. Dr. Spence was asked, Dr. Spence, and he felt no concern because the request was for the disposal of \$250,000 bonds. However, he affixed the seal and the sale later was approved by the board of governors.
There never was any motion of recommendation made for the disposal of mortgages or other financial documents, Dr. Spence said as a rule a written request from the bursar was considered sufficient.
There never was any motion of recommendation made for the disposal of mortgages or other financial documents, Dr. Spence said as a rule a written request from the bursar was considered sufficient.
None know the Canadian banking system better than the bankers themselves. None are more interested in stemming the present agitation for nationalization of credit. They will serve their own interests by using such knowledge as a basis for initiative in meeting such criticisms as have any sound basis, and in particular in devising some system of controlling credit against both over-expansion and over-contraction.
Evidence accumulated to indicate that when the banking act is up for revision at the coming session of parliament the demand for radical revision will be more widespread and more intense than ever before. This is perhaps an inevitable result of the accidental synchronizing of this periodical revision with the depression. But the fact that they are concurrent makes it all the more necessary that the bankers themselves should take early and effective steps, along this line themselves.

IN MEMORIAM

Passed away Oct. 2, 1931
"What a kindness we give Herbert's hand to clasp!"
His patient face to see,
To hear his voice, to see him smile—
As in the days that used to be,
But some sweet day, we'll meet again,
Beyond the toil and strife,
And clear each other's land once more.
In heaven, that happy life,
Remembered by Brothers,
Clifton and Roy Long.

Fragrance Sealed In Metal

"SALIA" TEA

"Fresh from the Gardens"

Coalition Governments.

The question of coalition, or union, governments has been brought very forcibly to the attention of the people throughout the Western provinces of Canada within recent months. There is undoubtedly a very considerable body of public opinion which favors the reorganization of governments at the present time upon a non-partisan basis—that is, the formation of cabinets of ministers inclusive of representatives of all existing political parties, with the strongest men chosen from each to constitute the Government.

But the average elector has but a hazy idea as to how this can be brought about. Many people entertain the view that all present parties are equally responsible if coalitions are not effected. If an official offer of coalition is made by the head of the Government in office, and it is rejected by the other parties, or parties, the latter must accept full responsibility for the decision. There is, however, only one person in each Province who can take the initial step leading to coalition. That is the Prime Minister.

Under the British system of parliamentary government the King, or his representative, invites the leader of the party having a majority in the House of Commons, or Legislature, as the case may be, to form a Government. He becomes Prime Minister. It is then his sole prerogative to select his own ministers. He may consult as many people as he chooses, but he, and he alone, names his ministers. Nobody else has any rights in the matter, except, of course, that such ministers must be approved by the people themselves by election to the Legislature. Having chosen his ministers, the Prime Minister alone can demand their resignation from the Government.

It was Premier Ramsey MacDonald who proposed the formation of a National Government in Great Britain; it was Premier Sir Robert Borden who proposed Union Government in Canada during the war in 1917; it was Premier Bracken who proposed coalition in Manitoba this year; it was Premier Tominer who recently proposed coalition in British Columbia. Nobody but the Prime Minister has any right to do so. For a leader of an opposition party to propose coalition would be to infringe on the prerogatives of the Prime Minister.

Once a Prime Minister does propose coalition to the leaders of other parties then a large measure of the responsibility for the coalition of such a form of administration is shifted on to their shoulders, and it becomes a joint responsibility of all to so compromise their differences as to make a union of their forces effective.

Coalitions in the past, both in Canada and elsewhere throughout the Empire, have been brought about in times of emergency in order to carry through certain policies deemed by all in the interests of the country but which it would be extremely difficult, if not impossible, for a government representative of only a section of the people—even of a majority of them,—to do by itself. Therefore, when coalitions are formed the exact nature of the emergency to be met, and the policies by which it is to be met, must of necessity be clearly stated, and it is on the basis thus set out that coalition takes place. This was true in the case of the present National Government in Great Britain, and also when Union Government was formed in Canada to win the war.

Much of the opinion in favor of coalitions today is founded in the idea that party politics and party Governments are a mistake; that the whole citizenship should be united in one party and one Government; in a word, that Provincial Governments at least should be in the nature of a municipal council, or board of directors of a company. Whether such an ideal is practical is another question. There are divergent groups in many company directorates, companies and municipalities. The same is true in municipal councils, although the members may not be definitely classified under any group name or as Government and Opposition. But the parties or groups exist just the same.

In fact when any two persons join forces to bring about any given result a party is formed, and the same is true when two persons unite to oppose any given policy or line of action. In fact, coalitions become necessary when, because of a number of parties, no one party can command a majority and thus form a Government. Coalitions, therefore, are a necessary evil, and the party system, and it would appear that there will continue to be parties just so long as everybody does not think, see and act alike on public questions.

Finally, a coalition government is not created through a joining of forces by a few individuals, but a union of parties. Only by a merger of parties for a given purpose can the required strength be given to a coalition. One or two individuals might enter a Government to add strength to that Government, but it would not be the coalition. Parties must unite to bring about a coalition.

A Long Imprisonment

Toad Released From Concrete Block After 22 Years

Cracking a large concrete block removed by blasting from the Welland south dock of the Welland Ship Canal, workmen were astonished to see a toad pop out from the centre of the block after it had been split. The dock was built in 1910, therefore the toad had been imprisoned for 22 years. It appeared slightly dazed for a few minutes after gaining its freedom, but was soon hopping about like any other toad. It seemed quite normal with the exception of its feet, which appeared to be under-developed.

Auto Has No Seats

Wife Of Indian King Rides Sitting On The Floor

After his visit to Europe the Emir Faisal advised his father, Ibn Saud, King of the Hedjaz, to buy automobiles for the entire royal family. The result was a \$150,000 order. The coachwork of the cars is polished aluminum. The one for the Emir's mother is completely closed in and has no seats. Instead its floor is spread with thick carpets. Overhead are electric fans to cool the heat of the Arabian desert.

A "cheerful telegram" campaign to boost the sending of good as well as bad news by wire, has been started in Scotland.

Suffered A Severe Attack Of Dysentery

Mr. P. J. D. Moulard, Vernon, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest. "Wild Strawberry is sure relief for dysentery, colic and diarrhoea, but I always use I got the genuine Dr. Fowler's."

One Well-Managed City

Louisville, Kentucky, Took Simple Way Of Effecting Economy

Louisville, Kentucky, will face its next fiscal year, September 1, with a cash surplus of more than \$400,000, the majority of its employees will be on a full salary basis and considerable reduction in taxes is promised.

Cheques are being written for \$140,000 to pay back a 10 per cent. salary cut which went into effect on January 1. At the same time the tax rate has dropped from 23.4 mills to 22.3 and assessment values have been cut 7 per cent.

The explanation is simple. In the closing days of 1931 Mayor Harrison, of Louisville, announced a 10 per cent. salary cut for civic employees, and at the same time promised them that should they effect sufficient economies despite the reduction in the tax rate and assessment, they would be given the back pay.

The effect was instantaneous. Economies were effected in every department. The savings came from positive cuts of the employees, such as curtailing gasoline supply, care in driving trucks and other vehicles, substituting of materials—in short, from thrifty vigilance.

Even the taxpayers showed an improved tone. On July 28, 89 per cent. of the taxes had been paid, only \$587,046 unpaid of the total \$3,059,945 receivable as of January 1, 1932.—Winnipeg Tribune.

HAS LOST FAT FOR THREE YEARS

68 lbs. Gone Altogether

A woman writes:—"For nearly three years I have been taking Kruschen Salts every morning in hot water, and have lost 68 lbs. of fat. My weight before taking them was 198 lbs., and it is now 128 lbs. Compare the difference—it is marvelous. My mother and sister are also taking Kruschen and lose a few pounds, and think they are wonderful. As regards diet, it is not necessary to do a little bit of dieting; in my case I have never denied myself anything since I started taking Kruschen Salts every morning in hot water, and do not eat many pounds of sugar. I don't think I shall ever be grateful enough to Kruschen Salts for the great help they have been to me, and shall never stop taking them, or recommending them to people I think need them."—(Miss) K.

Taken every morning, Kruschen effects a perfectly natural clearance of the intestines, and is a most effective and excessive watery waste matter. Unless this waste is regularly expelled, it festers and eventually stores it up out of the way in the form of fat.

Value Of White Whales

Good Results Obtained From Fish Meal As Fertilizer

Four Hudson Bay white whales brought to Winnipeg by the industrial development board of Manitoba, have yielded 896 pounds of oil and 290 pounds of fish meal, said an announcement of J. M. Davidson, secretary of the board.

Samples of the oil were submitted to the fish by-products committee and found to contain excellent lubricating qualities. Additional samples have been sent to 18 different companies in Canada, the United Kingdom, and the United States for examination.

Portions of the hides were tanned and made a satisfactory leather. Remarkable results from experiments with fish meal as a fertilizer also were reported by the committee. It is claimed in a recent test, on one acre of land, the yield of oats was increased from 22.8 bushels to 90.4 bushels. The fish fertilizer remains active in the soil for at least four years and is particularly suitable for Manitoba soils.

Persian Balm is alighting fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness. Softens, soothes and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

Better Than A Fee

Because they refused to accept pay for their services at a cabaret entertainment given in connection with the celebration of Lord and Lady Londale's golden wedding celebration, a number of London cabaret girls have just received diamond brooches from Lord Londale. The men performers were given diamond stick pins.

Worms in children, if they be not attended to, cause convulsions and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

Two Historic Documents

The death warrants of Charles I. and Mary Queen of Scots, are among the bequests in the will, published recently, of Miss Margaret Penelope Clegg, of Boston, Lancashire. She left the two death warrants and other historical relics to the Guildhall Museum, London, England.

Red snow is found in many places, among them the Forbidden Plateau, on Vancouver Island, British Columbia. It is due to the presence of innumerable microscopic plants.

Rome today has fewer citizens than it had 2,000 years ago.

Quick RELIEF from pain

A lot of things can cause a headache or other pain, but there is one thing which will always give you relief. Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systemic pain; to men who must work on, in spite of eye-strain, fatigue or nervousness.

Learn its quick relief for colds; for neuritis, rheumatism, lumbago. Be sure to get Aspirin—and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

Rise in Copper Prices

Trend Of Prices Will Give Encouragement To Mining Industry

Mining interests in Canada are watching closely the upswing of world prices in copper, and the view was expressed at Ottawa that a continuation of this upward trend would have a corresponding reaction in the industry which has been languishing in Canada for the past two years. Copper prices have risen to 6.35 cents a pound, while a few weeks ago they were as low as five cents.

"There is a big difference between that figure and the peak price of 15 cents," declared a prominent government official associated with the mines department, "but undoubtedly this increase, if it is maintained, will encourage the copper industry."

In eastern and central Canada the three large producers, Noranda, Inco and the Canadian Copper, are continuing operations; but Sheritt-Gordon had not been working for some time. With higher prices, however, prospects were that all the producers would come into play. In British Columbia, the Britannia and Granby mines were still in production.

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy has cured him of his trouble upon what it has done for others. It has a truly wonderful record, covering the whole range of asthma, and almost every part of this continent, and even beyond the seas.

Boys Won In Contest

Ontario Youths Beat Girls In Cooking and Sewing

Success crowned the efforts of two Ontario boys, when they invaded what has been regarded hitherto as women's precinct, at Woolwich township school fair.

Ralph Howlett and Gustav Brohm were the youths. Leading all contenders, girls included. Howlett won the sponge cake competition, and Brohm the two best buttonholes and button.

Wonders Have Vanished

Loch Lomond, Scotland, where Kaye Don made his world speed-record, has lost wonders which attracted tourists. Its floating island has disappeared, and scientists have explained that its "waves without wind" are merely the result of natural forces. The "fish without fins" are really vipers which travel from one island to another by swimming.

Should Make For Contentment

The entire State of Montana, it is estimated, will have a wheat crop of 56,000,000 bushels. The Lethbridge district of Alberta, some farmers predict, will have 40,000,000 bushels. Comparisons in this instance should make us feel contented with our prospects says the Lethbridge Herald.

A new style baby carriage hood is of glass that lets ultra violet rays through and keeps out the infra-red rays of light.

Unemployment in Germany continues to decrease.

Over-Population In Orient

But White Race Almost At Standstill Say Authorities

If the rate of increase of 20,000,000 a year continues, the world's population will be doubled in the next 100 years. It is already four times what it was 400 years ago. It is much more likely, however, that the population of the world will be stabilized before the year 2000. Indeed, population experts foresee that the great problem of the future will be to keep up the birth-rate—a problem which will be apparent in Europe probably in another 20 years.

Already the populations of Britain and Germany are at a standstill, while those of France and Italy show only slight increases. Russia—which is in both Europe and Asia—is growing at an amazing rate. Its population today is 127,000,000—5,000,000 more than last year. China's figures are doubtful, but the indications are that it has reached "saturation point." Its death-rate is rising because it has grown so quickly that she may be supporting more people.

Professor A. M. Carr-Saunders, one of the greatest authorities on population, states: "The huge increase in the numbers of Indians, Chinese, Japanese and Japanese, is largely due to European wars. Just as Europe swarmed in the 18th and 19th centuries during the period of industrial prosperity and improving amenities, so now is the east swarming. Fewer wars, more food, better hygiene, fewer epidemics, more opportunities for work—all these make a better standard of living, and hence bigger families can be maintained.

"There tends to be serious over-population in the east. In China, conditions are at their worst. In India the population has shot up by 30,000,000 in the last 10 years. Japan has nearly doubled its population. We have to make the limitation of population a state affair.

Applying For Work

Formerly Prosperous Many Willing To Accept Any Work

A census of job-would ads in various metropolitan journals reveals desperate sleighs in the business of job hunting. There is a commendable humility about those once on high plateaus of life seeking a place in the lowlands.

This, for instance, from a steady money paper: "I went from \$25 a week to \$26,000 a year. I lost my position because my corporation failed. I don't ask or expect \$26,000 yearly now. I am glad to start at \$25 a week again and give my employer my very best."

Still another from a woman: "I have had no experience whatever in earning a living. My \$9,000 income has shrunk to \$750 annually. I have had results in social welfare charity work. I need a home and will work for my keep. If I cannot make myself useful in some way, I'll stop out of the house. I am an honor graduate of a large eastern college, and have driven an automobile more than 100,000 miles here and abroad. I will take a chauffeur job at \$30 a week with no limit to hours, and I promise to be self-effacing and courteous at all times."

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the child without fail, are toned up into a very healthy condition.

Baby Autogiro

Motorcycle Of The Air Will Cruise At 30 Miles An Hour

Experiments are now proceeding with a view to producing in Glasgow the first baby autogiro—a machine without wings—deriving its power from a small motorcycle engine.

This motorcycle of the air will cruise at 30 miles per hour, and may cost \$1,000 only.

Air-Commodore J. G. Weir, is carrying on his latest experiment at Cathart.

"At the moment," he declared, "our operations on the first machine are confined to two men and a boy."

"We are hopeful that this aeroplane on which we have been working for the last month or so will lead to regular production if it comes up to our expectations. In three months we hope to have it in the air for tests. The new machine will be only 15 feet long—about half as long again as the average saloon car.

Searching For Old Bible A 300-year-old Bible that was loaned to a Christian church of Omaha ten years ago by Lincoln Jackson, of Fairbury, Neb., is being sought by the Chamber of Commerce at the request of Thomas Jackson of Fort Recovery, Jackson claims his brother Lincoln had brought it west from Fort Recovery. It was brought to this country from England in 1824.

Four things come not back: the spoken word, the sped arrow, the past life, the neglected opportunity.

To promote trade in "Swadeshi" products, Calcutta, India, will open a commercial museum.

Lost In Storm

Harrowing Experience Of Missionary In The Far North

Without food or shelter, lost in an Arctic blizzard for five days, was the harrowing experience of Rev. J. H. Webster, Anglican missionary at Cape Barrow, on the Arctic Ocean, as related by him in Winnipeg recently.

An inexperienced and bad-tempered lead dog was the cause of his trouble. Last January the missionary was travelling Eskimo village, in 30-below-zero weather, a blizzard blew up, and the lead dog tore his harness and disappeared into the storm.

"Before I realized it," Rev. Mr. Webster said, "I had incautiously left the six amazing trustworthy dogs and ran along the trail, giving no thought to the danger to which I was exposing myself in leaving food, stove, fuel and dogs behind."

The tracks of the runaway dog were soon obliterated, and the missionary turned to retrace his steps only to discover that he was lost. He wandered until nightfall, and then lay down in his parka to sleep. The storm continued unabated the following day, and he moved on. The second and third nights he slept in the snow, and he realized he was growing weaker. On the fourth morning he dug himself out of the snow to find the storm was over and the skies clear. He did not feel hungry, but his legs would scarcely bear his weight, and he finally dropped on the ice. He was awakened by a native who had come to search for him, and taken back to the mission.

High Protein Content

Wheat Harvested This Year In Western Canada Of Good Quality

Preliminary test made on the protein content of the new wheat crop of western Canada shows very satisfactory results. A maximum of 18.1 per cent. was found in No. 1 Northern from Manitoba in 376 samples tested, and the minimum 10 per cent., although below the average for last year, was better than the five-year average, which included last year. The tests on 500 samples of No. 1 Northern from Saskatchewan points showed a maximum of 18 per cent. and a minimum of 10.8 per cent. with the average working out at 14.8 per cent., compared with an average of 14.8 for all No. 1 Northern from the past three years. "The number of samples received from Alberta was too small to make comparative tests.

The Oil For The Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house is a good many "journeys" for the doctor. It is not only good for the children when taken with corn oil, and for the mother who suffers from pains and aches, but there are directions for its use on almost every ailment. It is always a bottle of it in the house.

Secrets Of The Skies

Monster Astronomical Observatory To Be Built In States

Pooling resources, the University of Chicago and the University of Texas plan a co-operative new astronomical observatory—surpassed only in size by the Mount Wilson Observatory—to search out the secrets of the skies.

Announcement of the project was made by Vice-President Frederic Woodward, of the University of Chicago. The observatory, he said, would house an 80-inch reflecting telescope. It is expected the observatory will be completed by July 1, 1938, at a cost of about \$375,000.

Quick action saves trouble, worry. Keep Douglas' Egyptian Liniment all-ways handy. Stops itching instantly. Cures itching quickly. Relieves Barber's Itch and Ringworm.

War Memorial

Canada's Memorial At Vimy Ridge Will Take Two Years To Complete

Two more years will elapse before Canada's great memorial at Vimy Ridge is completed. Meanwhile, recently there was witnessed the laying of the last block of stone, weighing nine tons, at the summit of the pyramid. This latter information was called to the authorities at Ottawa by Brig-General H. T. Hughes, chairman of the battlefields memorials commission.

The Vimy monument is the last of the seven which have been erected by the Canadian Government to commemorate the achievements of the Dominion's troops in the Great War. The others have been completed.

Awarded Scholarship John L. Cathie, bread-van driver, of Toronto, because of his high general proficiency standing at the University of Toronto, last year, has been awarded a \$250 scholarship for 1933. Cathie was elected secretary-treasurer of his class for the next year by the freshmen prior to the holidays, during which he has been employed on a bread route in order to earn funds to put him through the sophomore class.

BEST FOR ADULTS, TOO

Japanese Scientist

Lives Among Lepers

Has No Fear Because Disease Is Not Contagious

Seventeen years among the lepers of Taiwan, Formosa, Japan, have left Dr. Makimoto Iwaga in perfect health and confident he will never contract the dreaded disease.

Stopping at Montreal on his way to Berlin, where he will deliver a paper on his experiments with ultra-violet rays and leproic bacilli before a convention of scientists, the eminent Japanese physician told interviewers he was "neither courageous nor foolhardy" in believing it unlikely he should become a victim of leprosy. "And that simply because leprosy is not contagious, a fact not generally known by laymen but widely recognized among specialists in the matter," said Dr. Iwaga.

After years of laboratory experiments, Dr. Iwaga said he had recently killed leproic bacilli by the special use of ultra-violet rays. "But that is only the beginning," he added. "We have yet to negative the bacilli in the human organism—and that is a difficult step."

Condition of lepers in Formosa was described as follows by Dr. Iwaga: "Our lepers live in comfortable sanatoria, equipped with the very latest in scientific apparatus, and receive the careful attention of physicians who keep posted on every development of science as it affects their specialty. There is almost the life of a normal human being. Marriages between lepers are not infrequent and are sanctioned by the Japanese government. Missionaries and nuns are usually attached to these sanatoria and it is a curious fact that sooner or later nearly all lepers become Christians."

Shorten Working Hours

Solution For Unemployment Problem Offered By Labor Congress

"Six-hour day, five-day week." The oft-repeated cry of labor again resounded as the Trades and Labor Congress of Canada, in conference at Hamilton, Ont., reiterated its stand and passed a resolution which placed it on record as favoring "adoption of six-hour work day and five-day week by all public authorities in order to increase the opportunity for employment."

This course, if adopted, ultimately by governments, manufacturers and industry generally, would lead to tremendous increases in employment, delegates believed, and there was not a dissenting voice as President Tom Moore of Ottawa, placed the resolution before the congress.

Chinese Aviators

Three Boys From Calgary Leave For Orient To Aid Nationalist Army

Three Chinese boys left Calgary recently for their homeland to join the aviation corps of the Nationalist army. They were Sam Mah, Captain Marri and Joe Mar who made farewell plane flights before leaving. The boys were trained by Jack Palmer, noted pilot. Numerous other Chinese youths are in training here and plan to join the Nationalist flying forces soon.

ST. CHARLES MILK UNMILKED UNADULTERATED

Challenge Government Statements As to Possibilities of Commercial Fishing In Hudson Bay Waters

Strong criticism of the Dominion Government report on the commercial fishing possibilities of Hudson Bay and Straits, is made in an analysis prepared by the Fish Committee of the Industrial Development Board of Manitoba, following release of the findings of the Hachey investigations of 1930.

Mr. Hachey's statement that "as a result of the total work covering the whole of Hudson Bay, not a single commercial fish was taken, hence it is quite easy to arrive at a definite conclusion that a deep water fishery of commercial importance does not exist in Hudson Bay," is challenged by the committee with abundant evidence gathered from eminent authorities. This evidence indicates that commercial fish in substantial quantities do exist in both the Bay and the Straits.

The committee points out that, although the expedition left Halifax on July 26, returning on September 20, it actually spent only 50 hours in fishing operations.

Seven hours 15 minutes with hand lines; 12 hours 15 minutes with drift nets; 2 hours 55 minutes with long lines; 57 hours 50 minutes on trawling operations.

It further points out that, although the superficial area of Hudson Bay is 576,000 square miles, the record of palling times supplied by Mr. Hachey shows that the expedition traversed, in the process of investigation, less than 5,000 nautical miles.

The report refers further to the fact that for seven days investigations were conducted without bait.

The committee's report gives detailed information regarding the investigation of Dr. Alexander Baykov, who is attached to the Biological Board of Canada, at the University of Manitoba. This information proves the presence of commercial fish in Hudson Bay. Dr. Baykov has in his possession specimens of cod caught by Mr. Hachey during his expedition. These cod are very small and young and thus might not possibly be brought within Mr. Hachey's category of "commercial fish," but the committee claims they constitute definite evidence that cod do exist in Hudson Bay and that the scientific evidence submitted by Mr. Hachey to the effect that the waters of the Bay were too cold for reproduction, is open to question.

Dr. Baykov is an eminent authority on the fish industry and has in his possession records of other expeditions into the White Sea and Arctic Ocean, in which the latitudes traversed and the equipment used are almost exactly similar to those of Mr. Hachey's expedition. This information indicates that had the Hachey expedition continued operations into September, it is quite possible that they would have found an entirely different situation in regard to the supply of cod in Hudson Bay waters. In the month of September, the Russian expedition found gigantic schools of cod in almost exactly the latitude of Hudson Strait and under similar conditions all around, except that their expedition continued a little later in the season. Mr. Hachey, with Halifax as his base and having to return before winter set in, could not prolong his investigations to that date, but nor could anyone working from Halifax. But an expedition working from Churchill could do so and might conceivably find cod in September.

"Getting Even" Is Costly

Means Harm To Higher Character and Self-Respect

You cannot "get even" with one who does you an injury except by getting on his level; that is what evenness means. No possible ill from without can be equal to the harm you can inflict upon yourself by sinning against your own higher character and self-respect. "Getting even" with wrong, injustice and selfishness is too costly an indulgence to be allowed.

Should Eat More Cheese

Canadians could do much for a great industry as well as contributing to their own sustenance in the use of a cheap and nutritive diet by a greater consumption of cheese. It should be made a staple food and be found on the table at all times.

Over 234 million acres were sown to wheat in the world last year.

"What is the matter?"

"Ah, Doctor. I can hardly get my arms over my head—and it is nearly the same with my legs."—Lustige Kiste, Leipzig.

W. N. U. 1960

Combine Harvester and Wheat Quality

Combines Made That Grain Goes Out Of Condition In Storage

The combine has come into the Canadian West in large numbers in the last few years, and complaints have come from grain companies, who have to keep grain in storage in elevators, that the grain goes out of condition in storage. They claim that the grain appears to be "straight" when it comes in (i.e. containing not over 14.5 per cent. moisture), but that it spoils in storage, and when they look into its history they find that it is combined grain, cut and threshed without curing in the field.

The fundaments studies have been started on the process of "moulding" in storage. Out of the whole investigation it is hoped to obtain information that will make possible a statement of what is safe to do, whether the new methods of harvesting should be modified, or whether they are safe if practised with suitable precautions.

Wheat Exports

Sharp Increase Is Shown As Compared With Last Year

A sharp increase in the export of wheat, with western Canada's new ocean seaport, Churchill, taking its place in the record, is shown in a report issued by the Dominion Bureau of Statistics.

In the five weeks ended September 1, export clearances amounted to 16,732,749 bushels. This compares with 10,473,083 bushels for the corresponding period last year. Practically one-half the clearances since August 1 have been through the port of Montreal, while Vancouver has handled about one-quarter of total clearances. Shipments from Churchill totalled 8,237,713 bushels during the five-week period. Both Montreal, with 8,517,500 bushels clearances, and Vancouver, 4,017,145 bushels, show heavy increases as compared with a year ago.

A feature of the bureau report is the statement the clearances of Canadian grain through United States ports show a marked decrease. The shipments since August 1 have totalled only 1,979,000 bushels compared with 3,384,000 bushels shipped during the same period last year.

In Dr. MacLean's opinion the proposal contains points worthy of attention. He had not heard of latest proposal of Premier Brownlee of Alberta and declined to discuss the matter in detail. On the angles from which the question had been considered in the past was the emphasis in certain universities, on some of the professional schools. For instance, the University of British Columbia might develop its school of marine engineering to a high degree and leave to other universities the task of developing high grade schools in other branches. By co-operation and agreement along this line there was an opportunity of avoiding unnecessary duplication and saving expenses.

Support Is Promised

Canadian Provinces All Interested In Success Of Grain Show

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference, according to reports from those who attended the recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buckle, Minister of Agriculture and chairman of the exhibition and executive of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

Compulsory insurance for autobus passengers has been decreed in Yugoslavia.

Zexios, great painter, died of laughter at one of his pictures.

Arranging For World's Fifth Poultry Congress

Italy Making Great Preparations For Show Next Year

Prof. Alessandro Ghigi, director-general of the 1933 World's Poultry Congress, was in Ottawa recently in connection with the fifth congress. Prof. Ghigi interviewed the Federal Minister of Agriculture concerning Canada's participation in the congress, which takes place in Rome, September, 1933. In addition to this he discussed with Canadian members of the World's Poultry Science Council details of the congress.

According to the congress director-general, Italy is making great preparations for this event. The show will take place in the ancient market of the Forum. The "market" is a circular gallery, six stories high, with an old Roman "road" leading to each tier. From these "roads" open dozens of rooms in which the exhibits will be placed. The King of Italy is the Royal patron and will probably open the congress in person. Mussolini heartily endorses the congress and it is expected will be present some time during the exhibition to meet the delegates.

Farms In Canada

Heavy Increase In Number Of Farms In Last Ten Years

There were 17,574 more farms in Canada at the time of the 1921 census than in 1911, according to figures issued by the Dominion Bureau of Statistics. The total for 1921 was 728,664, and for 1911 it was 711,090. There were decreases in the eastern provinces from Ontario to the sea, but increases in all the other provinces. Saskatchewan showed an increase of 17,021 in the decade, Alberta 14,454, British Columbia 4,106, and Manitoba 947. There were 41 farms in the Yukon.

Prince Edward Island had a decrease of 536; Nova Scotia, 1,988; New Brunswick, 2630; Quebec, 1,662, and Ontario, 5,879.

There was a total of 586,229 farms owned by their occupants, 74,382 (tenanted and 67,942 partially owned). Full ownership of farms decreased 4 per cent. in the decade, while tenant farmers increased 33 per cent.

Backboard May Have To Go

Residents Of Ilesboro On Penobscot Bay Want Cars

Few isolations are secure against the forward march of the automobile, even Bermuda, in mid-ocean, has to be always on the alert to vote down the motor threat to her repose. On Ilesboro, however, on Penobscot Bay, the backboard still reigns. Ten miles from shore, Ilesboro has wardens of the automobile, and most of the summer residents would gladly keep the machine age at arm's length indefinitely. But the permanent residents have grown restive at being deprived of a lively and entertaining instrument of civilization. They want automobiles more than they want quiet and are likely to get them for the issue is coming up at a special town meeting.

Empire Trade Ship

May Sail From England For Canada Next Spring

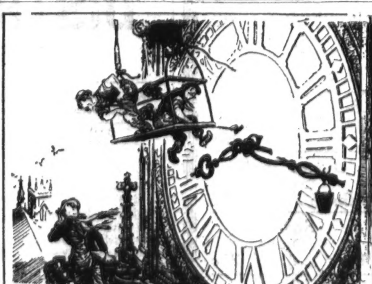

Response from manufacturers and exporters in the United Kingdom to an invitation to display their goods for the benefit of Canadian buyers at Montreal on the liner "Laurentine" has not been sufficient to justify the sailing of the vessel on October 1.

Numerous firms have indicated they are awaiting publication by the United Kingdom and Canadian Government the decisions arrived at during the Imperial Conference at Ottawa before exhibiting their goods. As these decisions will probably not be made public before the end of October it is hoped the empire trade ship will sail for the Dominion next spring.

Much Ado About Nothing

"So you told Mrs. Brown, did you? And what did Mrs. Brown say?" the defending counsel asked the witness.

Opposing counsel objected to the question as irrelevant, and a long and heated argument ensued before the judge allowed the question to be put. "Now," exclaimed the triumphant counsel turning again to the witness, "what did Mrs. Brown say?" "Nothing," was the reply.

Foreman: "Hi, why aren't you getting on with yer washing?"

Workman: "Bill accidentally fixed the pall to the minute hand, but it's round again in half an hour."—The Humourist, London, England.

Facts About Tobacco

Weed Is Grown In Nearly Every Province Of The Dominion

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa:

Tobacco growing was introduced by French settlers in the early colonial days.

Government assistance was first given in 1735.

In 1871, the year of the first decennial census, production was estimated at 399,870 pounds for Ontario and 1,196,345 pounds for Quebec.

In 1921 there were some 7,200 farms producing tobacco in Ontario and Quebec, and approximately 70,000 persons were engaged in the production or manufacture of tobacco and its products.

Tobacco is grown in nearly every province in the Dominion.

Canada's production of commercial tobacco for 1931 was estimated at 51,000,000 pounds.

Beveled curbs are being tried along English highways to avert the overturning of automobiles, which slid against them.

Value Is Recognized

British Museum Authorities Build Library To House Old Newspapers

Each day there is found a column called "Peeps Into the Past" which brings again to our attention what was happening in this area in days gone by. The papers from which these have been taken are absorbingly interesting in that they open a door into the past through which may be seen the activities of that day; the problems which interested the people and the different stages in the development of the country.

Some people are wont to say "A waste of time and money to keep old newspapers," when they throw them away every evening after reading them. This is not the opinion of the British Museum authorities. Recently they have built a new library solely for the accommodation of old newspapers. More than 14 miles of shelves have been built and the volumes of more than 2,000 daily and weekly newspapers from the United Kingdom and the Dominions for the past 132 years are being housed there. Accommodating for another 50 years has also been provided.

The value of these papers, of course, cannot be estimated. They throw a flood of light on the feelings that agitated the people during that time. Through the papers can be traced the growth and reform changes in thought, as well as much that is of historical significance. To the research student they are invaluable. Professor Gilbert Murray, the famous British scholar, says that the older a newspaper is the more valuable it becomes. "If we only had even the file of a newspaper of the fifth century B.C., imagine what could be learned of those days from it!"—Regina (Evening) Leader-Post.

Real Service For

The Sleepy Motorist

Connecticut State Police Protect Them While They Take Nap

Tourists from other states, motoring in Connecticut, are sending home word of the service rendered in the course of duty by state police.

A driver rolling along in Connecticut late at night is likely to have an officer pull up beside his car and signal him to stop. Then the officer says:

"Do you feel sleepy?"

If the answer "yes," as it would be for many motorists late at night, the officer tells him to "Pull up at the side of the road and take an hour's nap. I'll call you." He does, and the motorist then continues on his way sufficiently refreshed to be a safer driver.

Many accidents have been caused by weary motorists falling asleep at the wheel. Wary drivers, feeling a drowsy spell overtaking them, usually pull up at the side of the road without being told, to await a wider awake feeling. Taking a nap with police protection and with a policeman acting as alarm clock is a good solution of a common problem.

—Danville, Commercial News.

Use Old Slave Trail

Route Taken By Aliens Trying To Cross Border

The route which fleeing slaves once used to escape from the United States into Canada now is being used reversely by aliens seeking to enter the United States from Canada.

United States border patrolmen state that their chief duty these days is to prevent the transportation of aliens across Lake Erie. They say that the Canadian shore from Amherstburg and Sandwich through to Point Pelee is thickened and skirted with marshlands just as is the Ohio shore from Marblehead, across Sandusky Bay, to Toledo. It was these same sections of shoreline which afforded sanctuary for slaves when they sought their freedom in Canada.

Foreigners apparently are undaunted by the hard times and the scarcity of jobs in the United States, patrolmen say, and are willing to take almost any kind of risk to get into this country.

Fishermen and run-runners ply back and forth across the lake under the cover of darkness. And the run-runners are special centres of attraction. Now that the demand for Canadian liquor in the United States has decreased considerably, they will gladly bring an alien across for a few dollars.

Scotland Wants Quiet Sunday

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading, Sunday excursions and Sunday movies.

Vicar, to victor in local fight — "I understand you have been indulging in a pugilistic encounter, and that you have severely injured your opponent. Is that true?"

"The answer is in the affirmative," was the reply.

Little mortar bricks, with their strength increased 60 per cent., by sweetening them with table sugar, were shown to the American Chemical Society in session at New Orleans.

Survey Results In Better Picture Of Weed Problem In The West And Points To Possible Remedy

Second Edition Of "Exeter Book" Appears

First One Came Out Thirteen Hundred Years Ago

The second edition of the oldest book of poems in the English language has just appeared.

The first edition, which consisted of one volume only, came out 1,300 years ago.

This is the "Exeter Book" which has, for centuries, been kept in Exeter Cathedral. According to legend the book was compiled at the order of King Alfred, who caused the monks to collect in one great volume all the old poems of England. Such epic poems were sung by minstrels and handed down from father to son. To write them was, indeed, a considerable task. Consequently the original Exeter Book which consists of 262 pages of beautifully hand-written and illuminated manuscript—is unique.

The book was taken out of Exeter Cathedral for the first time in nearly 1,000 years. It was brought to London for the preparation of the second edition. This is limited to 250 copies. For the books is not printed; each of the original pages is reproduced by a special photographic process, and the whole is bound in buckram blocked in gold.

Intelligence And Ability

Are One And The Same Thing, So Scientists Say

Intelligence and ability are the same thing, and both are "innate," the British Association for the Advancement of Science was told.

The man with the highest intelligence is the man with the greatest number of inborn abilities, Prof. W. McDougall, noted psychologist, said. The difference in intelligence between man and the lower animals is really a difference in inborn abilities.

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things—propensities or "natural bent," and abilities. Instinct is a close linking-up of a "natural bent" with some particular ability. This close combination of the two governs actions of lower animals.

The secret of the ability of migrating birds to find their way accurately over long distances probably lies in powerful instinct, enabling them to note landmarks, Prof. C. G. Patten told the association.

He expressed doubt that birds have an instinctive "sense of direction." Young birds are guided by older birds who have over the route before.

Not Accurate Measure

Ordinary Spoons Should Not Be Used For Medicine

The new edition of the British Pharmacopoeia, which is the English doctors' official catalogue of drugs, recommends that household spoons should not be used for measuring doses of medicine. The reason is that they vary in size. The medicinal teaspoonful is 60 drops, and if you care to experiment with your own teaspoons you may be surprised to find how much those of different kinds differ from one another in size.

The differences in desert and table spoons are almost as great. Doses should always be measured in graduated glasses.

Many old medicines have disappeared from the British Pharmacopoeia. Among the 356 discarded medicines are camomile (which was really a relic of the Middle Ages) and Ipecacuanha wine. The latter has gone because it was made from sherry and their is now an international agreement that no drugs made with wine shall be used.—Trib-Bits.

Less Butter In Storage

Cold Storage Warehouses Show Drop In Both Butter and Eggs

Butter and eggs in cold storage warehouses on September 1 showed decreased quantities as compared with a few years ago, while other commodities, with the exception of fish holdings increased, the Dominion Bureau of Statistics reported.

Creamery butter storage at the first of the month totalled 304,014 lbs., compared with 39,890,281 lbs. on September 1, 1931. Dairy butter holdings were 337,185 lbs. against 420,271 a year ago. Cold storage eggs decreased from 14,379,032 to 11,787,969 dozen; from 3,306,093 to 961,288, and frozen 5,809,837 to 4,984,142 dozen.

Trainmen Were Puzzled

Trains Halted By Ants Breaking Contact In Signal Box

Ants, common red ants, stopped traffic on the Louisiana division of the Texas & Pacific Railroad for a time, much to the annoyance of everybody. Passenger train No. 24, eastbound, encountered a red light near Scottsville and halted. Trainmen were unable to find the cause. Train No. 26 had the same trouble. An investigation revealed that ants had worked into the signal box and formed the contact. Many ants had been electrocuted, breaking the current and causing the signal to remain red.

This year 4,000,000 British subjects in England must pay an income tax. Last year the number was 2,250,000.

In response to requests from numerous organizations in western Canada a conference on the destruction of weeds by means of chemicals was called in Edmonton in the fall of 1932.

This conference asked the National Research Council to undertake a programme of research with reference to the destruction of weeds and recommended strongly that the p-gram should not be limited to the use of chemical weed eradicators. The Council appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee then undertook the task of developing a programme co-ordinating as far as possible all activities in the entire field of weed control investigations in the prairie provinces.

One of the committee's first actions was to initiate a weed survey. A special investigator was appointed to study and compile the results of surveys by the provincial departments of agriculture in the prairie provinces and to make a personal reconnaissance of this area. This work he carried on for two years, then prepared a report which is now in press, and which, with its accompanying maps showing the distribution and prevalence of the worst weeds, gives a better picture than we have had hitherto of the weed problem in the West and the kind of action required to meet it.

The provincial departments of agriculture undertook a programme of field experiments with chemicals, under a system carefully planned in conference. Grants were made out of funds placed at the disposal of the Committee by the National Research Council, to assist various university workers in the investigation of some of the more fundamental aspects of the problem, such as the growth habits and root systems of weeds, the diseases of weeds (which may spread to crop plants), and the effects on the soil of chemicals applied for weed control.

At the last meeting of the committee representatives of the Federal and Provincial Departments of Agriculture, and of the universities, recommended unanimously that a popular bulletin should be issued, discussing weed control in the light of the newer investigations.

The Division of Biology and Agriculture of the National Research Laboratories undertook an extensive programme of research on the use of chemicals as weed killers. This included the testing of a wide variety of chemicals with a view to the selection of the most effective and useful ones, and the investigation of their effects on plants as modified by a large number of factors in the plant, in the environment, and in the mode of employing the chemical. The first part of this work was done in greenhouses at the University of Alberta, and had progressed far enough to justify laying out field experiments this season for the further testing of twelve of the most promising chemicals. A careful study has also been made of the fire hazards involved in the use of chemicals, a common ingredient of commercial weed killers, and similar substances. A paper is now in press showing clearly the conditions under which it is safe and those under which it is dangerous to use such materials.

These studies, in some of their more fundamental aspects, will be continued to still better advantage in the new laboratories at Ottawa, where there will be facilities for controlling growth conditions, thus making it possible to observe accurately the effect of any chemical treatment applied to the weeds.

Recipe for Making Men

Ingredients
One red blooded boy
Parents' loving care
Outdoor exercise

Method

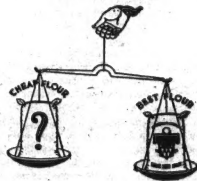

Mix work and play with study. Combine wisely under direction of loving parents. Add muscle building foods... plenty of bread made from Robin Hood flour. Rear with patience and understanding. Turn out at 21, a credit to parents. This recipe makes one man.

ONLY a mother knows the painstaking care required to raise a boy. She bears the responsibility of educating him and developing his body from babyhood so that he will be equipped to make a comfortable living. In times like these, mothers have to sacrifice in order to give their children the advantages of a normal youth. They cannot slight the mental and moral training of their children, nor can they handicap the child through lack of good nourishing food. Since bread is essential, smart mothers know how foolish it is to economize on flour when even the best is inexpensive.

Prairie mothers have considered Robin Hood flour the Standard of Excellence for more than a generation. It remains today the flour in which you can put your trust. Robin Hood is CLEAN, PURE and of highest food value. It is the safe flour to use "for making men."

STUDY THIS PICTURE— THEN THINK

The difference in cost between CLEAN, PURE Robin Hood flour, and CHEAP, poorly milled flour is only 1c PER DAY FOR A FAMILY OF FOUR.

QUICK QUAKER OATS

Sudden Death of Mr. A. W. Sharpe

A. W. Sharpe, prominent farmer, of our district died suddenly Monday morning at the age of 68. Born near Mount Forest, Ont., Mr. Sharpe came west over 30 years ago and has been prominently connected with agriculture ever since, serving as an official of numerous dominion, provincial and district livestock bodies. As a grain grower, he won many prizes also.

At the time of his death he was Alberta Director of the Canadian Hereford Breeders' Association, director of the Canadian Sheep Breeders Association, and president of the Central Alberta Wool Growers' Association. He was one of the cattle judges at Edmonton Exhibition last July.

He is survived by his widow, two sons, three daughters and two adopted sons.

Funeral services were held on Wednesday afternoon from St. Andrew's United Church. Rev. R. B. Layton assisted by Rev. Wright of Morningdale conducted the services which were attended by hundreds of friends from all parts of the Province. Out of deference for Mr. Sharpe, the annual sheep sale, which was scheduled to be held October 5 and 6 was closed down during Wednesday afternoon.

Ken regret at the death in Lacombe Monday of A. W. Sharpe, 68 years, well-known livestock breeder, was expressed by E. L. Richardson, manager of the Calgary Exhibition and Stampede, Monday.

"I was extremely sorry to hear of his death, he will be very much missed in livestock circles in western Canada," said Mr. Richardson.

Geo. B. Johnston Electrocuted at Alinx

George B. Johnston, Lacombe, met instant death Tuesday when he was electrocuted and thrown from a platform on which he had been repairing a 13,000-volt transformer, 15 feet above the ground. Deceased was an employee of the Calgary Power Company. He leaves a wife and family in Lacombe.

The funeral was held this afternoon.

CELEBRATES ANNIVERSARY
This year Sweet's Pharmacy celebrates the anniversary of twenty-five years in business, the last light of which were in Lacombe.

Sweet's Pharmacy is owned and operated by W. C. Sweet, who graduated with the highest honors, in dispensing in the class of 1907, from the Toronto University. Since graduating, Mr. Sweet has successfully passed examinations for which he received diplomas for Saskatchewan and Alberta. Mr. Sweet has owned stores in Toronto, Saskatchewan and Alberta.

With this experience you may have confidence that your prescriptions are filled as the doctor orders them. The drugs used in Mr. Sweet's dispensary are pure, fresh and of the highest quality.

When you buy from Sweet's Pharmacy you keep your money in Lacombe and thus help Lacombe grow. In the last eight years, Mr. Sweet has improved his store until it is now one of the finest Drug Stores between Calgary and Edmonton.

THE SHEEP SALE

A large number of buyers from all over the province attended the Annual Sheep Sale here until it was fairly brisk and fair prices were paid for good rams. All animals entered in the sale were of a high standard and in view of the present shortage of money, a satisfactory sale was held. A list of buyers and prices paid will be published next week.

Get your winter coat cleaned now at the Rainbow Cleaners.

INQUEST FRIDAY
The report into the death of Guy Ayres, killed in an automobile accident south of here three weeks ago will be held at the Town Hall tomorrow (Friday) at 10 a.m.

EVANS DRAWS 10 MONTHS
The case of J. E. K. Evans, charged with obtaining money by false pretences proved rather an unusual one for the Red Deer Court on Monday, the defendant electing to conduct his own defence without counsel. He was charged with having obtained 28 tons of hay from a farmer of the Rimbey district, issuing a post-dated cheque on a Calgary bank for same.

His defence was that he intended to sell the hay in Calgary at a profit and deposit the money in time to meet the cheque. He failed to do this, claiming that the hay was not up to the grade he had examined and had to sell at away under his expected price. His conduct from then on, the judge said, was "idiotic, the man not bothering to notify the farmer about his hay nor payment for same; the money he obtained paid the freight and his own expenses only."

Mr. Evans offered a very able defence. The jury found him guilty as charged, and he was sentenced to one year at Fort Saskatchewan, less the two months he had already served.

ST. ANDREW'S CHURCH
Rev. R. B. Layton, Pastor.
L. D. Wright, G.U.E.C.C. Mus. Director, Organist, Choir Leader.
Sunday, October 9th
11:00 a.m. Morning Service and Sunday School. Anthem by Junior Choir.

Sweeter, More Fragrant in Your Pipe!

Any pipe tastes better, from the time you first load the bowl with Ogden's cut plug — it's sweeter, richer, cooler and more fragrant.

OGDEN'S CUT PLUG

If you "roll your own," use
Ogden's fine cut
cigarette tobacco.

WORLD HAPPENINGS BRIEFLY TOLD

A suitable home for the Canadian legation in Tokyo may be expected in the very near future.

Jimmy Oates, first man to cross Canada by motorcycle, now plans to motorcycle from Ottawa to Churchill, Switzerland sent 2,200,000 pounds of silk and rayon products to Great Britain last year.

Thirty more Doukhobors have been sent to Plover Island. There are now about 100 men on the island.

Three Chinese boys have left Calgary for their homeland to join the Nationalist army air force. They were trained locally.

The report to the League of Nations on Manchuria advises establishment of Chinese autonomy under Japanese advisers.

The British Government has received no intimation from the United States regarding postponement of the world economic conference, expected to begin in London in October.

Lord Wakefield, owner of "Miss England III," fastest speed boat in the world, announced he would take no further part in motor boat speed contests.

Population contained within the area designated as Greater Vancouver, according to the census of 1931, is placed at 308,340; it is reported by the Dominion Bureau of Statistics.

Honey Producers May Expect Good Prices

Yield Over Whole Dominion Lighter This Year

Reports made by C. B. Gooderham, Dominion apiculturist, state there is about a 65 per cent. crop in Ontario, a little over 50 per cent. in Saskatchewan and 60 per cent. in Alberta.

While the honey crop in the Red River Valley is somewhat lighter on account of dry weather injuring the clover crop reports from central and northern Manitoba indicate a better crop than last year.

The favorable weather in the spring and early summer developed the clover crop about 10 days earlier than usual in Manitoba, with beneficial results to the honey harvest. According to Mr. L. T. Floyd, provincial apiculturist for Manitoba, producers may expect good prices in view of the fact that the yield over the Dominion is only about 80 per cent. normal.

To Distribute Wealth

Spanish Authorities Decide To Dispose Of Confiscated Jesuit Properties

The National Assembly of Madrid has approved of a law providing for the distribution for social welfare of about \$30,000,000 worth of confiscated Jesuit properties.

It was stipulated that in case Jesuits did not appear in a legal writ as the owners of alleged Jesuit properties, such holdings would also be confiscated and the listed owner receive five per cent. of the former annual income.

This disposal of Jesuit properties followed within seven months a government decree dissolving the order in Spain, its birthplace 400 years ago. Confiscation was ordered and today's law provided for disposal.

British Journalism—"I represent The Daily Scoop. At what time did his lordship die?"

"His lordship is not yet dead."

"Oh, isn't he? Well, then I'll wait."

The Graf Zeppelin, German dirigible, recently arrived at Friedrichshafen, Germany, completing its fourth round trip of the year at Pernambuco, Brazil.

Acidity Overcome Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and indigestion. 25c. & 75c. red pills, everywhere. Ask for Carter's by NAME.

Fewer Cars Operated

Falling Off in Registration Is Noted by Bureau of Statistics

For the first time since government registration of motor vehicles of all classes in Canada has been completed, there was a decrease in 1931, the Dominion Bureau of Statistics reported.

Total registration last year, including passenger automobiles, trucks, buses, etc., was 1,208,836 vehicles, compared with 1,239,888 in 1930, and 1,195,594 in 1929. The density decreased from one motor vehicle for every 8.2 persons to one for every 8.5 persons in 1931. Nova Scotia, Prince Edward Island, and Quebec showed increases, but all the other provinces recorded decreases. Saskatchewan had the largest decrease, 21,298 vehicles. Alberta followed, 6,966, and Manitoba third, 3,744.

Prince Edward Island had 7,744 motor vehicles; Nova Scotia, 43,739; New Brunswick, 33,730; Quebec, 179,572; Ontario, 563,824; Manitoba, 75,564; Saskatchewan, 108,563; Alberta, 95,686; British Columbia, 95,220; Yukon, 198.

The report indicates that 71 per cent. of the passenger automobiles registered in Saskatchewan were on farms; 54 per cent. in Alberta; 49 per cent. in Manitoba, and only 13 per cent. in British Columbia.

Winnipeg Newspaper Union

(By Ruth Rogers)

The Winnipeg Newspaper Union, which is about to be organized, is reported by the Dominion Bureau of Statistics.

The ship is due back in New York on the afternoon of Thursday, May 28th. The "Carinthia" is the newest steamer in the Cunard fleet, was especially constructed for cruising and is of 20,000 tons gross. The shore arrangements of the cruise are being managed by Thos. Cook & Son.

Record For Survey Ship

Government Vessel Sets Mark For Far North Sailing

Completing what is said to have been a new record in far north sailing, the S.S. Ocean Eagle, government survey ship, in command of Captain William Poolok, returned to Churchill after a 17-day voyage into the Foxe Basin regions. The "Eagle" steamed near the southern extremity of Cockburn Land, east and slightly south of the magnetic pole. It is stated that no steamer of the proportions of the "Eagle" had sailed so far north in that area east of Baffin Island.

"Hello, Benson! Have you seen Smith lately? I've been looking for him high and low for the last three months."

"Well, those are the places. He's been dead about that time."

Style No. 853 is designed for sizes 4, 6, 8 and 10 years.

Size 8 requires 1 1/2 yards 35-inch with 1 1/2 yards 35-inch for blouse.

For later fall wear, a cunning idea that is exceedingly smart is a tweed mixture in wine-red tones with plain lining wool crepe gumples.

Rayon mixtures and novelty wools are attractive with plain lining gumples.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Plan World Cruise

Cunard Cruiser "Carinthia" To Make Cruise Of Southern Hemisphere

The Southern Hemisphere will be explored for the first time by a cruise liner when the Cunard cruiser "Carinthia" makes her world cruise next January, leaving New York on January 7th. The entire cruise will be made under the Southern Cross. The duration of the cruise will be 189 days with a distance of approximately 36,301 miles, calling at 35 ports.

After leaving New York the "Carinthia" will call at Kingston, Jamaica, then through the Panama Canal to California, Hawaii, down to the South Sea Islands, visiting in rapid succession those atolls of fabulous beauty and fascination, Tahiti, Rarotonga, Samoa and the Fiji, continuing to New Zealand and Australia, New Guinea, the Dutch East Indies, including Java and Java, the Strait Settlements, Ceylon, makes a stop for the first time in the history of any cruise at the famous Seychelles Islands, (Port Victoria), down the coast of sunny East Africa from Mombasa to Cape Town, across the South Atlantic to Montevideo (for Buenos Aires), Santos, Rio de Janeiro, and back to New York. Practically all ports of the itinerary have seldom been visited by Canadians or Americans.

The cruise will be particularly interesting to Canadians in that a large number of British possessions will be visited, including Alaska, New Zealand, Australia, the Strait Settlements, Ceylon, Seychelles, Kenya, Zanzibar, Union of South Africa and Barbados.

The ship is due back in New York on the afternoon of Thursday, May 28th. The "Carinthia" is the newest steamer in the Cunard fleet, was especially constructed for cruising and is of 20,000 tons gross. The shore arrangements of the cruise are being managed by Thos. Cook & Son.

New Anti-Aircraft Gun

Claimed To Have Range Of Seven and Eight Miles

That a new anti-aircraft gun can bring down an attacking bomber seven and one-half miles up in the air, is the claim to those conducting tests on the Riviera coast near La Seyne, France. The secret of the gun's construction is jealously guarded by the firm whose engineers planned it. Anti-aircraft guns have previously proved effective at a height of about three and one-half miles, but modern aircraft can attain much greater altitudes. In the experiments off La Seyne an aeroplane with pilot and mechanic, ascended seven and one-half miles towing, suspended 1,000 feet beneath it, a target on which the anti-aircraft gun opened fire with live shells. Aviation, military and naval men of Europe are watching the tests.

Perfect House Planned

Product Of World's Best Brains Leaves Nothing To Be Desired

The perfect house—the product of the best brains of the world—is to be built near London within the next few months. It is to be the house of the future, with an aeroplane landing stage on the flat roof, and is designed for the average British family of four—rather, mother, and two children. The site is at Stanmore, Middlesex, and the house is designed to trap every moment of sunlight. When there is no sun you press a switch and every room can be filled with artificial sunlight. The householder can make his own weather—inside, for another switch alters the temperature throughout the house. The house is cooled in summer and warmed in winter by an intricate system of thermostatic heating. The plumbing is the idea of an American, and includes an arrangement by which even the temperature of the bath-water is automatically controlled to a desired warmth. Holland is responsible for the kitchen, and the balconies are the work of a Californian. The arrangement of the nursery, with its special window-panes and composition floor, comes from Sweden. The windows and door frames are the products of the finest British engineers. The bath, which can be either pink, green, or black, according to taste, is let into the floor. All cupboards and wardrobes are built in, and the dining-room sideboard emerges from the wall when a button is touched. An extra large dining-room table can be raised from the floor at the pressure of a button—let into the floor.

Recipes For This Week

(By Betty Barclay)

CRISP MOLASSES COOKIES
2 1/2 cups special cake flour, sifted.
1 teaspoon baking powder.
1 teaspoon salt.
2 teaspoons ginger.
1 cup molasses.
1/2 cup butter or other shortening.
2 teaspoons soda.

Sift flour once, measure, add baking powder, salt, and ginger, and sift again. Heat molasses, remove from fire; add shortening and soda. Add flour gradually. Chill. Roll very thin on slightly floured board. Cut with floured cookie cutter. Bake in moderate oven (350 degrees Fahrenheit) 10 minutes. Makes 3 1/2 dozen cookies.

STUFFED PRUNE SALAD
2 packages cream cheese.
1/2 can coconut, Southern style, chopped.
2 tablespoons mayonnaise.
24 cooked prunes, seeded.

Blend cheese, coconut, and mayonnaise. Stuff prunes with mixture. Serve on crisp lettuce. Garnish with additional mayonnaise. Serves 8.

SPECIAL MACARONI SALAD
2 cups cold cooked macaroni.
1/2 green pepper, chopped.
2 raw carrots, thinly sliced.
1 medium sized onion, chopped.
1/2 cup French dressing.

Combine macaroni, vegetables and French dressing. Add sufficient Eggless Mayonnaise to bind ingredients. Chill before serving. Serves six.

Highland Society Bars
Women From Membership

Not Even Royal Lady Can Preside At Annual Festival

The Highland Society of London have decided to ask the Prince of Wales to preside at their next annual festival in June of next year. The decision to make arrangements so far ahead is due to the fact that the patronage of any member of the Royal Family can only be assured by making direct representations many months in advance. The Society is more or less precluded from inviting a Royal lady to preside at their annual festival as the Act of Parliament of 1816 and 1831, by which they have been incorporated, debar women from membership.

Old Orders Still Used

Some of the standing orders still in force in the House of Commons are over two centuries old. An old Norman French phrase is still in use in certain instances, notably "Le Roy le veult" (the King wishes it) in giving the Royal assent to a Bill.

Feeder Purchase Policy

Has Been Renewed For Five Months From August 1

Renewal of the Feeder Purchase Policy designed to encourage the winter feeding of cattle and lambs of suitable type and quality is announced by the Hon. Robert Weir, Federal Minister of Agriculture. Under the terms of this policy, broadly put, the Federal Department will pay the reasonable travelling expenses of a farmer or his agent to the stockyard point of purchase, the feeder sales, or nearest station to range at which feeder stock is purchased. To secure the benefits of the policy at least one car of stock (20 head of cattle or 40 lambs, or a combined car, figured on 2 lambs as the equivalent of one head of cattle) purchased is subject to approval as to type and suitability by the official representative of the Dominion Live Stock Branch serving the point of purchase. Special provision has been made to extend the benefits of the policy respectively to farmers of Eastern Canada, of the Prairie Provinces, and of British Columbia. Complete details and information about the policy and the benefits can be secured by writing the nearest stockyard agent, the Dominion Live Stock Branch, or direct to R. S. Hamer, Chief, Cattle Division, Dominion Live Stock Branch, Ottawa. The policy is operative for a period of five months from and after August 1, 1932.

Fruits Supply Minerals

Liberal Use Will Tend To General Good Health

The greatest value of a plentiful supply of fruits and vegetables in the home lies in the minerals they supply, without which it is impossible to build sound teeth and strong bones, and enjoy general good health. The most important of these minerals are calcium, phosphorus, iron, iodine, magnesium and sodium. These, as well as most of the vitamins, are liberally supplied by fresh fruits and such vegetables as the tomato, bean, pea, and the raspberry.—Department of Agriculture, Ottawa.

Ray Penetrates Fog

Apparatus for projecting an invisible ray that penetrates fogs has been installed on two German liners.

The beam is said to increase by twenty times the distance through which the human eye can see and is as efficient by night as it is by day.

Many Imprisoned For Debt

British Jails Crowded and Law May Be Revised

Revision of ancient British laws which imprison debtors is envisaged, because jails throughout the country are crowded with men and women who have failed to meet their obligations. On any day of the year there are 250 debtors in British prisons. Approximately 15,000 were sent to prison last year for "willfully refusing to pay" their debts. This year there is a slight increase so far. Brixton prison, London's jail for debtors, is full. Its daily population of debtors is 101. This class of prisoner accounts for about 20 per cent. of the prison population of the whole country. An analysis of the debtors in British prisons shows that 418 were sent there under the Married Women's Act of 1913 to maintain their wives; 242 under affiliation orders, and 102 for non-payment of rates and taxes. None of them can be imprisoned twice for the same offence, but a percentage of those committed for wife maintenance, or affiliation orders, may serve several terms in jail during the year because they have not continued payment as soon as they were discharged from a previous term.

Solves One Problem

Press Buttons and Mechanical Cook Will Prepare Meal

One of the latest inventions is a mechanical cook which turns out pancakes or coffee jellies hot, according to which of two buttons you press. And wonderful things are to follow. The inventor has already perfected a ham-and-egg machine; Press the button. Crack eggs the egg whisk a slice of ham on the grill. Many ambitious outwits their skill. Many a promising marriage has been wrecked on the rocks of home-made buns. But all these tragic happenings will soon be things of the past. Returning to a home provided with a multi-but button, Edwin, having embraced a smiling Angelina, will plan out a dainty menu. Then buttons will be pressed and in a few moments the most wonderful meal will be served.—TIT-BITS.

Many Familiar Sayings

Quotations From Shakespeare Are In Use Every Day

Even the most illiterate quote Shakespeare every day. Indeed, most of us do not know we use quotations for those current sayings from the Bard of Avon's writings: "Dogs are a doomful; eaten out of house and home; as good luck would have it; mad as a March hare; a snake in the grass; a woman will not tell what she does not know; birds of a feather; care killed the cat; cake is dough; every dog has his day; fast and fast find; every man to his trade; familiarity breeds contempt; good wine needs no bush; make hay while the sun shines; past cure, past care; pitchers have ears; poor by the card; the world on wheels; we burn daylight; won in haste and wed at leisure; give the devil his due, and what the dickens!"

Ontario Is Interested

Province Expects To Be Well Represented At World's Grain Show

Ontario will be adequately represented at the World's Grain Show in Regina, July 1 to August 5, 1933. Hon. J. A. Kennedy, provincial minister of agriculture, said at a meeting of the show's Ontario committee at Toronto recently. The minister advised the committee Ontario should be represented in the intercollegiate and junior grain judging competition. Plans are being completed for holding grain judging competitions at several strategic points throughout the province to select representatives for a final competition at Guelph. There three Ontario representatives will be chosen. Consideration was given the preparation of an educational exhibit at the show, representing the natural resources of the province.

Gift For King George

Two vases bearing the royal arms of Portugal, which were in the late King Manuel's English residence, Fulwell Park, Twickenham, Middlesex, are bequeathed under his will to King George as a testimony of "deep gratitude for his many kindnesses."

Remember way back in the good old days when, in order to find out if the family was at home on Sunday, you knocked on the front door instead of looking in the garage?

Sixty-five per cent. of the manufactured products used in Argentina are imported from other countries.

Pelicans in flight move their wings in unison, taking their beat from the leader and keeping time with him.

THE HOUSE OF DREAMS-COME-TRUE

MARGARET FIEDLER

Author of
"The Splendid Folly," "The Hermit
Of Far Bay"

CHAPTER XXXI—Continued

Tortured beyond bearing, this final taint, levelled at the woman he held more dear than anything in life, snapped his last thread of self-control.

He flung himself forward and his hands were gripping, gripping at the soft ivory throat from which the taint had sprung. He felt the woman writhe, struggling to pull his hands from her neck. But it meant nothing to him. He did not think of her any longer as a woman. She was something vile—leprose to the very core of her being—a thing to be destroyed. The thing which had made of all Jean's promised happiness a bleak and bitter mockery.

The mad Tormarin raged through his veins like a consuming fire. He would break her—break her and utterly destroy her just as one destroyed a deadly snake.

And then across the thunderous roar that beat in his ears came the beloved voice, the voice that would have power to call him out of the depths of hell itself—Jean's voice.

"Blaise! Blaise! What are you doing? . . . Stop!"

CHAPTER XXXII

The Dividing Sword

Slowly, reluctantly, Tormarin's hands loosened their clasp of Madame de Varigny's throat, and with a swift, flexible twist of the body she slipped aside and stood a few paces from him.

Jean looked from one to the other with horrified eyes.

"Madame de Varigny?—Blaise?" she stammered. "What is it? . . . Why, you—you might have killed her, Blaise!"

He stared at her blankly. His release of the Italian woman had been in mere blind response to Jean's imperative appeal that he should desist. But the mist of ungovernable anger had hardly yet cleared from his brain; the blood still drummed in his ears like the roar of the sea.

"Blaise"—Jean spoke impudently. "What were you doing? Tell me!"

With an effort he seemed to recover himself.

"It's a pity you didn't let me finish it, Jean," he said harshly. "Such women are better dead."

Madame de Varigny was fingering her neck delicately where the pressure of Blaise's grip had scored red marks on the cream-white flesh. She seemed quite composed. Her smile still held its quiet triumph and her long dark eyes gleamed with the same

mockery that had brought her within measurable distance of quick death.

"As Monsieur Tor-ma-rin seems to find a difficulty in explaining—permit me," she said at last. "He was angry with me because I bring him the good news that his wife is still alive, that he need mourn no longer."

While she spoke her eyes, resting on Blaise's mask-like face, held an expression of malicious satisfaction.

"His wife . . . alive?" repeated Jean dazedly. "Blaise, is she mad? Nests has been dead years—years." Then, as he made no answer, she continued rapidly, a faint note of fear vibrating in her voice: "Isn't it so?"

"Blaise—speak! Quickly, tell her—Nests has been dead years!"

"He cannot tell me anything about her which I do not know already, Miss Peterson, seeing that she is my sister and has been living with me ever since her husband's cruelty drove her from his home."

"Is it true, Blaise?" whispered Jean.

Belief that some substance of horrible truth lay behind the Italian's coolly uttered statements was beginning to lay hold of her.

"Blaise, Blaise"—her voice rising a little—"say it isn't true—tell her it isn't true."

He looked at her speechlessly, but the measureless pain in his eyes answered her more fully, more convincingly than any words.

"You see?" broke in Madame de Varigny triumphantly. "He cannot deny it! I was who told him of her death and I who now tell her that she still lives. Listen to me, mademoiselle, and I will recount you how—"

"No!" interrupted Jean proudly. "Whatever there may be for me to hear, I will hear it from Blaise—not from you."

"Tell me everything, Blaise," she said simply.

He took her outstretched hands, drew her slowly towards him. No one, reading now the calm sadness, the stern imprint of endurance on his face, could have imagined it was that of the same man who, a few moments earlier, had been swept by such a tempest of uncontrollable anger.

"Jean," he said very gently and pitifully. "I'm afraid that what Madame de Varigny says may be true. I have no proof that it is not."

"Nor have you any proof that it is," broke in Jean swiftly. She swung round on Madame de Varigny. "Where is your proof—where is your proof?"

The Italian smiled.

"Monsieur Tor-ma-rin will find his wife in my car. I bade the chauffeur wait with it at the lodge gate."

"Do you mean you have brought Nests—here?" cried Blaise.

"Why not?" replied Madame de Varigny, with a return to the same exasperating complacency with which

she had originally described her whole scheme of revenge. "And—here? Surely her husband's house is the proper place to which to bring his wife?"

"She cannot remain here," said Blaise with decision.

"No? For the moment that was not my idea. I brought her with me because I thought there could be no more convincing proof."

Blaise looked at her searchingly. He fancied he detected a false note in her voluble speech, and a new idea presented itself to him. Was the woman simply putting up a gigantic bluff? Or was it really Nests, his wife, waiting in the car at the lodge gates? It occurred to him as perfectly feasible that it might be merely some woman whose remarkable resemblance to the dead girl had suggested to the Countess's fertile brain the scheme that she should impersonate her.

His mind seized eagerly upon the idea, bolstering it up with Madame de Varigny's own admission. "I made little changes in her appearance," she had said. "The colour of her hair, the way of dressing it." Probably she was relying on those "little changes," and on the blurred recollection resulting from the length of time which had elapsed since Nests's death, to aid her in her plan of introducing as his wife a woman who closely resembled her. He felt morally sure of it, and the light of hope suddenly shone bravely.

"I believe you are deceiving me," said quietly. "Lying—as you have lied all through the piece. I'll come and see this 'wife' you have waiting in the car for me"—grimly. He turned to Jean. "Keep up your courage, sweet-heart," he said in a low voice full of infinite solicitude. "I believe the whole thing is a put-up job to separate us."

Jean smiled at him radiantly. She felt all at once very confident. In a few minutes this nightmarish story of a Nests still alive and claiming her rights as Blaise's wife would be proved a lie.

Tormarin crossed the room and opened the door.

"Now, Madame de Varigny—will you come with me?"

The woman hesitated a moment.

"Come," insisted Blaise firmly. "Or—are you afraid, after all, to bring me face to face with my wife?"

She shook her head.

"No," she said. "I am not afraid. It is only that I am so sorry—so sorry for the trouble this has caused."

Her eyes, soft and dark and liquid as the eyes of a deer, sought Jean's beseechingly.

"I am so sorry," she repeated. And passed, slowly, almost unwillingly, it seemed, out of the room, followed by Tormarin.

Jean raised her head from Blaise's shoulder and pushed back her hair, damp with perspiration, from her forehead. It seemed to her as though she had been down, down into some awful, limitless abyss of darkness from which she was now feebly struggling back to a painful consciousness.

That is the normal expectancy, Joseph M. Kincaid, chief of the agricultural meteorology division of the weather bureau at Washington states, as a result of the upward swing in the thermometer beginning in 1926.

Records show that the weather moves in currents of a few cold years and then a few warm years, Kincaid said. In the past, a change from one cycle to another has come gradually and, while not forecasting definitely a mild winter, he said that indications pointed in that way.

Without any doubt there is no evidence yet that a change to abnormal temperatures has begun.

Peculiar Method Of Burial

One of the strangest sights in the world is on a mountain top of Luzon, Philippine Islands. Fully clothed and sitting in groups of from ten to twenty-five each, there are hundreds of bodies of Igorots which have been mummified by the hot, dry air—their method of burial. It resembles a vast picnic.

Tons Of Cheese Exported

Five tons of Canadian cheese were exported to England from Quebec on the liner "Aurora," one of the largest shipments made from there in many years. It is expected that other large amounts of cheese will be shipped during the remainder of the navigation season.

Canada's Bacon Exports

Canada's exports of bacon to Great Britain increased from 184,576 pounds in July, 1931, to 2,450,000 pounds in July, 1932, putting her in fourth place among nations selling bacon to the United Kingdom.

Water—Why are you polishing the silver on your napkin?

Water—Not necessary here—besides, you will soil the napkin.

"I must think—I must think," she murmured. "Belovedest"—Blaise's voice was wonderfully tender—not with the passionate tenderness of a lover but with a solicitude that was almost maternal. "Belovedest, don't try to think now. Try to rest a little, won't you?"

And at that Jean came right back to an understanding of all that had happened, as the needle of a compass swings back to the frozen north. (To Be Continued.)

Problem Becoming Critical

Number Of Transient Unemployed Before Work When Offered

A local farmer interviewed seven transients on the streets of Hanna on a recent Saturday, offering harvest work at the going wage of \$1.50 and board. Not one of them would accept a job at this wage. But, in company with others of their ilk, these men have been soliciting food and clothing from Hanna homes.

The whole problem of handling transient unemployed is approaching a critical state. No doubt there are thousands of these unfortunate men who are willing to work, but who cannot secure employment. But, in the light of recent experience, it is increasingly evident that there are other thousands roaming the country who are not anxious to work, even when reasonable wages, with board and lodging, are offered.

It cannot be long before householders will be compelled to begin feeding the armies of transient unemployed. The burden, in this respect, is becoming heavier from day to day. One regrets turning away any human being who asks for food. But the country as a whole, not by the generosity of individuals.

And with a noticeable increase in the number who will not work it is apparent that crisis in the unemployment problem is fast approaching.—Hanna, Alberta, Herald.

Floating Air Station

German Ship To Be Stationed In Mid-Atlantic To Assist Air Travel

The North German Lloyd Company announced it had designated the liner "Westfalen" as a floating air station in mid-Atlantic to facilitate the establishment of regular air mail between South America and Europe.

The liner will be equipped as a mother ship for trans-Atlantic mail planes. This will include a landing platform, store of tools and spare parts, radio equipment and weather forecasting apparatus.

The liner will be permanently stationed midway between Bathurst, British Columbia, and a nearby point on the African Coast, and Fernando Noronha.

The establishment of a floating air station is expected to solve the fuel problem of the long overwater jump.

The recent international aviation congress at Rome revealed a triple race among Italy, France and Germany to be the first nation to establish a successful commercial air line to South America.

Another Mild Winter

Weather Bureau Expert Makes Favorable Prediction

Unless there is an unprecedented sharp drop in temperature, the weather man believes another moderate winter is in store.

That is the normal expectancy, Joseph M. Kincaid, chief of the agricultural meteorology division of the weather bureau at Washington states, as a result of the upward swing in the thermometer beginning in 1926.

Records show that the weather moves in currents of a few cold years and then a few warm years, Kincaid said. In the past, a change from one cycle to another has come gradually and, while not forecasting definitely a mild winter, he said that indications pointed in that way.

Without any doubt there is no evidence yet that a change to abnormal temperatures has begun.

Peculiar Method Of Burial

One of the strangest sights in the world is on a mountain top of Luzon, Philippine Islands. Fully clothed and sitting in groups of from ten to twenty-five each, there are hundreds of bodies of Igorots which have been mummified by the hot, dry air—their method of burial. It resembles a vast picnic.

Tons Of Cheese Exported

Want Trapping Privileges

Great Bear Lake Prospectors Ask For Change In Game Act

Claiming that the Federal Government through the present North West Territories Game Act seems to exclude whites from the territories, prospectors from Great Bear Lake now of Fort Rae are signing a petition asking for a change.

The petition requests that independent prospectors holding hunting licenses be permitted to trap fur-bearing animals in the winter, the catch to be limited to a specified number of pelts and the concession given only to bona-fide prospectors.

The present law forbids white persons to trap and hunt unless they have been a resident in the territories for four years. The petition charges that this is unfair discrimination and entails great hardships on prospectors, if unable to make a living in the territories during the winter months, they are forced south in the early fall.

THE RHYMING OPTIMIST

By Aline Michale

WITH THE TWILIGHT

Will you forget, at nightfall,
The lances of mellow light
That rest upon the river,
The tireless gulls in flight?

The river, slowly nearing
Its long-desired sea,
Will you forget, at twilight,
The prairie wind, and me?

You may forget, at nightfall,
Those scenes where once we moved,
And all the fading pageant
Of beauty that we loved;
But ever with the twilight
And those lost joys we knew
I shall come creeping back, dear,
I shall be near to you!

Third Largest Port

New Westminster Forging To The Front In Shipping Trade

New Westminster, B.C., is the Dominion's third largest seaport in the quantity of freight handled, it was announced recently by the New Westminster Harbor Board. The recent report issued by the Dominion Bureau of Statistics, Ottawa, did not mention the Fraser River port.

With 450,000 tons of cargo handled for the fiscal year ended March 31, 1932, the port is only exceeded by Vancouver and Montreal.

The bureau has announced that Saint John, N.B., was the third largest port with 415,167 tons.

Present prospects indicate the port business for 1932 will exceed 480,000 tons.

Popular Term In China

English Word "Modern" Stands For Everything That Is New

Most popular term among Chinese students is the English word "modern," phonetically translated into Chinese as "mo tun." It has come to stand for everything that is new, advanced and smart. The word is used also as a prefix to the names of shops, printing houses, book stores, barber shops, restaurants and what not.

The output of central electric stations in Canada last year was 16,610,000,000 kilowatt-hours.

Mystery Of Mars

Possibility That Sister Planet May Be Inhabited

If the plans of Mars is inhabited, the natives must be something like the North American Eskimos, the Rev. T. E. R. Phillips, noted British astronomer, believes.

Dr. Phillips, who agrees with Professor William H. Pickering, that there can be intelligent inhabitants on Mars, said in an interview between meetings of the International Astronomical Congress, that if such inhabitants exist, they must be able to endure tremendous changes in temperature within a single day.

During the day, he said, the temperature on Mars is well above the freezing mark, but when night comes it drops far below zero. Only persons of amazing physical stamina could stand such a change he said.

"Information now available suggests that life of some kind exists on Mars, but it would necessarily be differently constituted from life on the earth," Dr. Phillips said. "The air is much thinner, and because of the shifting temperature the native would have to be a hardy race."

Cabbage and Gout

Medical Men See Some Connection Between Vegetable and Disease

Cabbage that pillar of the vegetable kingdom that brings vitamins cheaply to our tables, is under medical suspicion as a cause of gout.

In his address to the Manitoba Medical Association in convention at Winnipeg, Dr. A. C. Abbott, Winnipeg, cited experiments carried out at Johns Hopkins University which showed winter cabbage caused gout in rabbits in the short space of three weeks. He told of a survey he has recently completed among Winnipeg school children in which his findings bore out this theory.

Dr. Abbott found it significant that children of British extraction whose diet was varied, showed less than 12 per cent of cases of thyroid gland while between 30 and 40 per cent of children whose people came from Europe had enlarged thyroids. He found central Europeans ate a tremendous amount of cabbage, in comparison with British people.

An Annual Custom

Children At St. Ives, England, Throw Dice For Bibles

Dice were thrown for Bibles at St. Ives, England, recently. The custom is observed annually, and three Anglican and three Nonconformist churches each received a Testament. The custom follows the provisions of the will, dated 1688, of Dr. Robert Wilde, and the cost of the Bibles is defrayed by rents from land known as Bible Orchard.

Sixty Is Fairly Fast

A man who says he "better way" is in the open country at 55 to 60 miles an hour writes to "The Star" that "speed maniacs" pass him going 70 to 75 miles an hour. No doubt these complain that they are sometimes passed by reckless persons driving 80 to 85 miles per hour. But isn't 60 miles an hour fairly fast in the first place?

Josiah Wedgwood was the most celebrated of English potters.

Little Helps For This Week

A soft answer turneth away wrath. Patience is not weakness. He who bears injuries without resentment triumphs in the end. Blessed are the meek for they shall inherit the earth.

"There's a time for work and a time for play. A time for everything good each day; But never a time in this short life For quarrels and angry words and strife."

I'll do anything for peace except fight for it.—Livingstone.

Experiments show that a good grade of glass can be made from the waste slag in iron blast furnaces.

No more dusting for me!

at least not with old-fashioned dust cloths. I've found a better way.

Thousands of Canadian women know that her "better way" is the Applender Wonder Paper. Made from clean rags and soft paper pulp scientifically treated with high-grade furniture polish, it dusts—as it cleans—as it polishes.

Wonder Paper is changing the old-established order of housecleaning. One neat package of it replaces more than yards of old rags that spread dust and constantly need washing to be sanitary.

You get twenty-five sheets of Wonder Paper for a quarter. Simply crumple a sheet into a soft wad, go over the furniture, woodwork, and the floor. The results are a delight. In half the time and with half the effort, you get a necessary task done far more satisfactorily. And when you're through, there's away the place of Wonder Paper. No shaking out, or washing, or dusting. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PARASANI, the Heavy Waxed Paper, the Green Box, most grocery, hardware and department stores have Applender Wonder Paper in stock. If you haven't, just send this coupon and we'll give you a booklet entitled "Lettovers," containing one hundred recipes, as a bonus.

Applender Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one package of The Wonder Paper and your 100 recipes for "Lettovers."

Snowden's Resignation Is Most Pathetic

The letter which accompanied Viscount Snowden's resignation from the British cabinet is a bitter and moving document. Reading it, one cannot help recalling Mr. Lloyd George's warning to the Liberals and Laborites who joined the National Government. There might be talk of compromise, Mr. Lloyd George said, but sooner or later they would wake to the realization that the Tories held the fort.

We do not know and no doubt we shall never know what happened behind the scenes at Ottawa, but the inference contained in Mr. Snowden's letter is inescapable. It is an outspoken and definite allegation of betrayal and it seems to justify Mr. Lloyd George's warning.

The letter is forceful, biting, sweeping and not a little pathetic. When Ramsay MacDonald, Snowden, Thomas and his associates split with the British Labor Party, they severed years of intimate association with the organization which they helped to inaugurate and to build. Much was written at the time of the sacrifice of sentiment which they were forced to make for the good of the country. But now, in the case of Philip Snowden, the sacrifice of sentiment has appeared to be of no avail. He believes that he has sold his birthright for a mess of pottage. And a second split, no doubt as personally distressing as the first, has appeared to him to be the only course compatible with manhood. "I am severing 40 years of close political association and co-operation in the work which transformed the party features of British politics," he writes. "I can no longer, without loss of all self-respect, remain a member of a government which is pursuing a policy I believe to be disastrous to the welfare of the country; a policy which will lead to disruption of the Empire and which is fraught with great danger to our international relations."

The British delegates to the Ottawa conference have come back after weeks of acrimonious disputes and sordid struggles with veiled interests, with agreements wrenched from them to avert the collapse of that conference and the exposure to the world of the hollowness of talk of imperial sentiment in economic affairs.

Nothing in my political experience has been more disgraceful and dishonest than the misrepresentations of the results of the Imperial Conference which are being circulated in the Tory press.

You cannot expect free traders to acquiesce even passively, in such a policy of national humiliation and bondage.

Mr. Snowden has been labelled a hopeless doctrinaire free trader, a social bigot, and since his accession

to the House of Lords, a political turncoat. A hopeless doctrinaire and a bigot he may be, but this letter of his seems to us to absolve him completely from the last charge.

However justified or unjustified in his stand he may be, Viscount Snowden of Lichenshaw today is a rather gallant and pathetic figure—a thin, biting little Yorkshireman, unsuited in manner and temperament to the House of Lords, yet isolated by an amazing turn of political events from the House of Commons where he fought his battles and which knew him in the days of his power.

The details of the split between Snowden and MacDonald we shall never know. Neither can we tell whether they will remain friends behind the scenes or whether Snowden's allegations of betrayal extend to his one-time closest friend,

Skin Loveliness

Easy to Have. Famous Vegetable Pills Better than Creams

The Alberta Pacific Grain Company Ltd.

COMMENCING business in the North-West Territories in 1901—four years prior to the formation of the Province of Alberta—The Alberta Pacific Grain Company, and predecessor Companies, carries in its records a long line of service to the farmers of Alberta.

ALBERTA Grain Company, Limited, under the able management of John I. McFarland, commenced business in 1901. Total production of wheat in Western Canada in that year had reached less than 65,000,000 bushels. Under Mr. McFarland's policy of fair dealing with all farmers, the growth of his Company kept pace with increasing wheat production in the West. In 1912 Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland, and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organization continued to grow. Its elevators followed the railway construction crews into the newly cultivated areas of Alberta and extended its operations into Saskatchewan and Manitoba.

WITH the completion of the building of the Panama Canal the "A.P." became a pioneer in the movement of grain to import markets through the Western route. Terminal elevators, having a capacity of 6,250,000 bushels have been acquired by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial stress of 1907-08; the war and its aftermath; boom periods and the business upheaval of the past three years—a period of years, many of which have been obscure and filled with business uncertainties. In all its three decades of dealings with thousands of farmers and the handling of hundreds of millions of bushels of grain, the Company has never failed in an obligation to any client. Among its customers today are pioneers of Alberta who drew the first bushel of grain they produced in the Province to an "A.P." elevator.

FAIR-DEALING with its customers, coupled with competent office and field staffs; efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system from its humble beginning in 1901 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are and will continue to be, those of the founder of the "A.P." system.

Take Hogs In

Trade for Tuition

Illinois Wesleyan University has agreed to accept farm produce from students in lieu of fees, a concession to the times which takes one back to an earlier day in American history when Harvard University agreed to the same thing.

President McPherson of the university explained the decision as follows: Illinois Wesleyan will accept farm produce to the full amount of tuition rates, paying a price above the market value, from the sons and daughters of bona fide farmers in the United States, and will also permit any matriculating freshman girl whose parents are farmers the right to full board and room in the college dormitories in exchange for farm produce to the amount of the board and room.

The grain accepted by the university will be stored in the local elevators at the homes of the students and will be disposed of by the farm manager of the university. Hogs, cattle, other livestock and other farm produce will be received as "tuition fees in kind."

There are many examples of barter taking the place of ordinary trade on this continent, but surely none more unusual than this.

LAND BARGAINS
